

Driving a **Higher Standard** in Industrial Hygiene Flow Calibration

“ Once the students progress to the electronic primary flow calibrators and experience the DryCal® and/or DC-Lite, their eyes light up, they breathe easier, and they typically exclaim, ‘Why didn’t you give this to us to begin with? It is so much easier, so much better!’

Thank you, Bios, for manufacturing a quality line of products and for being so dedicated to the Industrial Hygiene profession. ”

Neil J. Zimmerman, PhD, PE, CIH

Associate Professor of Industrial Hygiene, Purdue University
